**Fund Inception: October 3, 2011**  
**Total Assets: \$118 Million**

### Investment Objective

The KEELEY Mid Cap Dividend Value Fund seeks long-term capital appreciation through investments in mid capitalization companies that we believe are undervalued and typically pay a dividend. The Adviser defines mid market capitalization as securities within the range of the Russell Midcap® Value Index at the time of investment. The market cap range of the index changes daily, and as a result, the capitalization of small cap companies in which the Fund invests will also change.

### Philosophy

Typically, dividend paying stocks are only associated with larger-cap companies and the smaller cap companies are largely misunderstood or ignored. We believe the quality of the universe from which we generate investment ideas is inherently superior to the substantially broader universe of mid cap stocks, an index, or an ETF which are cap-weighted with significant biases toward sectors and certain industries.

In addition, we believe that dividend payers offer an attractive risk-profile as they generally outperform non-dividend payers in periods where equity markets are down.

## Investment Process

We focus our research efforts across a broad array of dividend-paying stocks. In evaluating the overall quality of a company, we view the investment universe in four distinct areas. Depending on company-specific valuations - as well as the current macroeconomic environment, we categorize equities into each of these groups:

### Attractive

These stocks demonstrate attractive qualities independent from their dividends.

### Growers

We expect these companies to grow dividends faster than the market due to earnings growth and low payout ratio.

### Solid-Steady

These stocks offer average yields, and grow their dividends in-line with earnings.

### High-Yield

These stocks offer above-average yields that we believe are sustainable due to strong balance sheets and/or strong cash flows.

From these four categories, fundamental research helps our team assess the sustainability of a dividend by analyzing the company's cash flow, balance sheet and dividend history.

## Portfolio Construction

- 60-90 stocks
- Maximum sector weight: +/- 5% benchmark
- Initial position size: 1%
- Maximum position size: 5%

## Investment Risks

Smaller and medium-sized company stocks are more volatile and less liquid than larger, more established company securities. Dividend paying investments may not experience the same price appreciation as non-dividend paying investments. Portfolio companies may choose not to pay a dividend or it may be less than anticipated.

KEELEY Mid Cap Dividend Value Fund ratings and performance are based on past performance at net asset value.

(1) Portfolio holdings will change, and should not be considered purchase recommendations. Top holdings do not reflect cash, money markets or options/futures contracts holdings.

(2) The Russell Midcap® Value Index is an unmanaged index that measures the performance of the mid-cap value segment of the U.S. equity universe and includes those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Midcap® Index is an unmanaged index that measures the performance of the 800 smallest companies by market capitalization of the Russell 1000® Index. The Russell 1000® Index is an unmanaged index that measures the performance of the 1,000 largest companies by market capitalization of the Russell 3000® Index. The Russell 3000® Index is an unmanaged index that measures the performance of the 3,000 largest U.S. companies by market capitalization. These Index figures do not reflect any deduction for fees, expenses, or taxes, and are not available for investment.

(3) The Morningstar Style Box™ reveals a fund's category as determined by Morningstar. For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth).

(4) Morningstar data © 2022 Morningstar, Inc.; all rights reserved. Morningstar data contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of funds in each fund category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. Ratings are for the Fund's I Share Class; other classes may vary.
